**Re: Supply Chain Engineering Co-Op Vancouver (Fall 2023)**

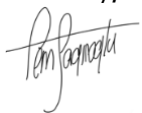

Dear Veronica Breen,

I am writing to apply for the Supply Chain Engineering Co-Op position at PepsiCo and become a part of a company that has made a remarkable contribution to the food and beverage industry. As a consumer of products produced by PepsiCo, I have always been fascinated by the innovative approach and commitment to sustainability that sets PepsiCo apart from its competitors.

As a highly motivated and skilled professional with 9 years of experience in Supply Chain Management, I am confident that I possess the qualifications necessary to excel in this position. With a proven track record of leading highly diverse groups to achieve business objectives, I bring a unique perspective to any team. As a tech-savvy individual, I have dedicated a considerable amount of time to automating processes and developing business intelligence tools that enable real-time monitoring. I firmly believe that companies should invest in accommodating the latest technological solutions to streamline business processes and enable their employees to shift from working to thinking, ultimately driving growth and success. My extensive experience in process improvement has equipped me with the ability to add remarkable value to PepsiCo. During my assignment at BRF SA, I was involved in a merger and acquisition project in Turkey, where we conducted an analysis of existing processes to identify potential synergies in production and operations. I identified an opportunity to redesign the trays used for finished goods, resulting in USD \$1MM saving on an annual basis as a greater number of products being palletized with the same dimensions, decreased pallet usage for material handling, reduced tray costs due to less material usage, and decreased truck usage for the same volume of goods distributed. I am confident that my expertise in identifying process improvement opportunities can help drive efficiencies and success for PepsiCo.

I look forward to discussing further steps of my application process with you. Please contact Douglas college Co-op at [co-op@douglascollege.ca](mailto:co-op@douglascollege.ca) or 604-527-5729 to arrange a convenient interview date and time. I am excited about the opportunity to join the PepsiCo team and make a meaningful contribution to the company's continued success. Thank you for consideration.

Sincerely,

Cem Sagiroglu
